

P15 Enhance Your Ultrasound Exam

Company Milestone

2002: Company Founded in Shenzhen, China
2008: Received "European Entrepreneurial Company 2008" award from FROST & SULLIVAN
2009: Received "Product Quality Leadership Award 2009" from FROST & SULLIVAN
2011: Received the Reddot 2011 Product Design Award for S20 in Essen, Germany
2013: Received "Ultrasound Market Growth Leadership Award, 2013" from FROST & SULLIVAN
2014: Received the iF product design award 2014 for S9 in Munich, Germany
2014: Received "Company of the Year in Ultrasound Market, 2014" from FROST & SULLIVAN
2016: Received "Product innovation in Electronic Endoscopy Market" from FROST & SULLIVAN
2017: Received the iF product design award 2017 for X5 in Munich, Germany
2017: Listed on Shenzhen Stock Exchange on April

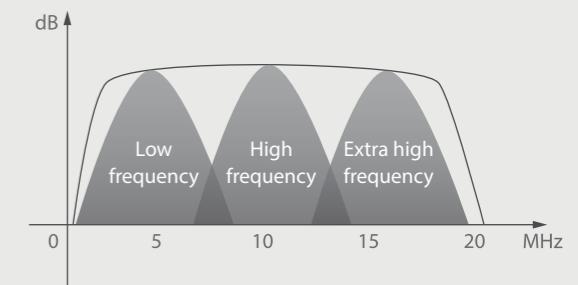

ISO 13485
CE 0197

A feature-rich system inheriting the Wi-Sono high-end platform, the P15 uses an array of advanced tools to help enhance the image quality. Its intuitive user interface is a true console with multiple intelligent functions, a cost-effective configuration and a simplified for the ease of use.

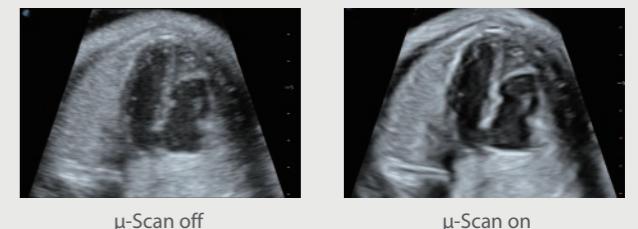

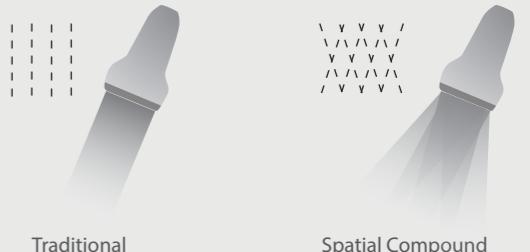

Super Wide-bandwidth Platform

Inheriting Wi-sono's ultra-wide system platform and with the advanced probe technology, high-resolution and deep penetration images are provided for precision medicine.

Spatial Compound Imaging

Spatial Compound Imaging utilizes several lines of sight for optimal contrast resolution, speckle reduction and border detection, with which P15 is ideal for superficial and abdominal imaging with better clarity and improved continuity of structures.

μ-Scan⁺

The new generation μ-Scan imaging technology gives you better image quality by reducing noise, improving signal strength and improving visualization.

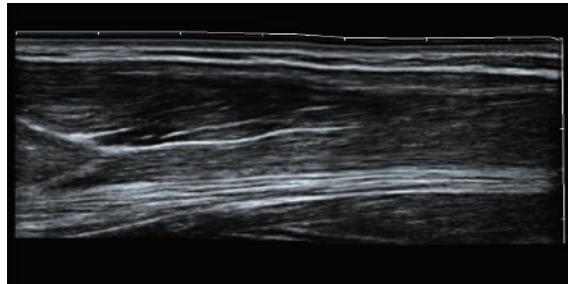

Dynamic Color

Dynamic color improves upon already existing color Doppler technologies for a clearer capture of color flow and detailed visualization of even tiny veins with lower velocities.

Real-time Panoramic

With real-time panoramic, you can acquire an extended field of view for large organs or long vessels for easy measurement and diagnostic efficiency. Accomplished in real-time for the convenience of the sonographers, any mistake can also be easily back tracked and corrected without interrupting the scan.

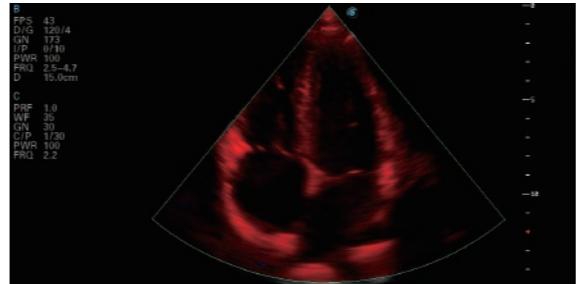

3D/4D

Outstanding volume performance with speed and convenience makes P15 outshine others on volume imaging.

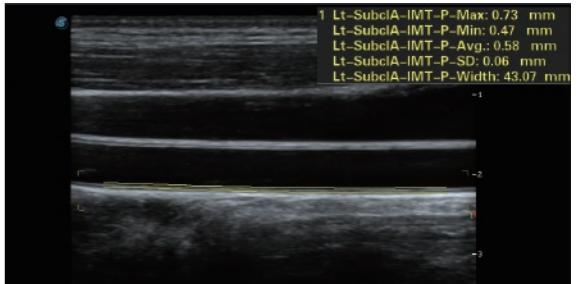

Tissue Doppler Imaging

Tissue Doppler Imaging allows you to quantitatively evaluate local myocardial movements and functions, with speed and strain/strain rate parameters.

Auto IMT

Quick measurement of intra-media vessel thickness ensures good reproducibility and high diagnostic efficiency.

Comfort and Productivity Lie on Design
